Melanie Arnold, age 27, Fargo, ND was diagnosed with Reflex Sympathetic Dystrophy (RSD) in 2007. RSD is an extremely debilitating chronic, painful and progressive disease. Sadly this condition prevents Melanie from doing the things she used to love such as biking, roller blading, taking long walks and playing softball.

Please help Melanie receive the treatment she needs to potentially put her disease into remission and allow her to live the life she did before RSD!
